Introduction

Developing Standards for Educational Excellence

Background: National Physical Education Standards

In August 2011, the National Association for Sport and Physical Education (NASPE) established a national task force to begin work on a curriculum framework for physical education based on the national k-12 physical education standards. Because the national k-12 physical education standards were up for review on NASPE's periodic review cycle, the task force was also charged with leading the national k-12 physical education standards review and revision.

The task force spent a great deal of time reviewing the literature and examining curriculum frameworks from other countries, states and content areas. The task force used this research to inform revisions to the national k-12 physical education standards and to develop grade-level outcomes for curriculum framework. Key findings from the literature include:

- Several factors influence levels of student engagement, including perceived competence, activity choice, and cognitive demand of the task.
- Motor skill competency is the underlying mechanism that promotes engagement in physical activity and adequate health-related fitness through adulthood.
- Intrinsic motivation is increased if students can choose the activity (autonomy) master the activity (competency) and participate in a supportive environment (relatedness).
- Competitive, full-sided games appeal mainly to boys and highly skilled girls, other students are often passive participants.
- After age 14, there is a significant decline in physical activity for all students, particularly for girls.

As a result of these findings, the task force developed grade-level outcomes that will lead to competency, particularly in fundamental motor skills; address the needs of less skilled students through a mastery-oriented environment, and that de-emphasize full-sided games and competitive activities. In addition, the national task force sought to ensure that:

- the standards reflect the content we teach and what we expect students to learn;
- the standards and grade-level outcomes are measureable;
- the standards parallel common core standards language/structure;
- materials are produced in formats the serve practitioners effectively.

After being subjected to several member reviews (May 2012, November 2012, and February 2013) as well as targeted reviews by groups with specific expertise in physical education, the (new) *National Physical Education Standards and Grade-level Outcomes for K-12 Physical Education* were released in 2013.

Background: South Dakota K-12 Physical Education Standards

The last review of the South Dakota K-12 Physical Education Standards (SDPES) was conducted in 2000 with the development of the South Dakota Physical Education Course Standards for High School Graduation to follow in 2006.

Following NASPE's lead, in 2014 the SDPES were reviewed and revised using the newly released *National Physical Education Standards and Grade-level Outcomes for K-12 Physical Education Standards* as a model.

The School Health program in the South Dakota Department of Education lead the review and revision process, which included the selection of committee members, to develop the SDPES. The SDPES committee consisted of teachers from elementary through post-secondary levels as well as individuals from outside agencies with an interest in physical activity and fitness.

The SDPES, which were approved by the South Dakota State Board of Education in _____, include student outcomes (what students should know and be able to do) in each grade from kindergarten through grades 8, and for two grade levels at high school. The standards reflect the following ideas:

Elementary Level – the focus is on fundamental motor skills as the foundation for movement competency.

Middle School Level - the focus is on application of fundamental motor skills and improving the balance of activities to retain interest of all students.

High School Level – the focus is on fitness/wellness, lifetime activities and personal choice.

While the standards identify what knowledge and skills students should know and be able to do, they leave precisely how this is to be accomplished to teachers and other local specialist who formulate, deliver, and evaluate curricula. The SDPES are designed to provide a framework for curriculum, instruction, and assessment practices.

The revision of the SDPES makes a number of important contributions to the potential for the delivery of improved physical education across the state. Implementation of the SDPES with a

commitment to providing qualified teachers, adequate instructional time, and increased linkages to other school curricular areas significantly increases the likelihood that schools will provide high-quality physical education instruction to all young people.

The Goal of Physical Education

The goal of physical education is to develop physically literate individuals who have the knowledge, health and skill related fitness, and confidence to enjoy a lifetime of healthful physical activity. A physically literate individual is someone who exhibits responsible personal and social behaviors that respects self, others, and environment.

To pursue a lifetime of healthful physical activity, a physically literate individual:

- has learned the skills necessary to participate in a variety of physical activities;
- knows the implications of and the benefits from involvement in various types of physical activities;
- participates regularly in physical activity;
- is physically fit;
- values physical activity and its contributions to a healthful lifestyle.

The South Dakota K-12 Physical Education Standards

The SDPES standards broadly and collectively articulate what students should know and be able to do to become a physically literate individual. The SDPES are:

Standard 1: *The physically literate individual demonstrates proficiency in a variety of motor skills and movement patterns.*

Standard 2: *The physically literate individual applies knowledge of concepts, principles, strategies, and tactics to enhance movement and performance.*

Standard 3: *The physically literate individual demonstrates the knowledge and skills to achieve and maintain a health-enhancing level of physical activity and fitness.*

Standard 4: *The physically literate individual exhibits responsible personal and social behavior that respects self, others, and environment.*

Standard 5: *The physically literate individual recognizes the value of physical activity for health, enjoyment, challenge, self-expression, employment opportunities, and social interaction.*

Organization of the South Dakota K-12 Physical Education Standards Document

The SDPES document displays each standard and its supporting information as follows:

- by grade spans;
- with the each of the 5 physical education standards listed; and a
- chart/grid listing the grade-level outcomes for each of the 5 physical education standards in that grade span.

The Grade Spans

The SDPES include student outcomes (what students should know and be able to do) for the following grade spans:

- Kindergarten through grade 5;
- Grades 6 through 8; and
- Two levels at high school.

Guide to the Number and Symbol System

The Standards are coded to cross-reference the Grade Span, the Performance Indicator, and the Grade Level.

Example: S1.E12.4

Combines traveling with balance and weight transfers to create a gymnastics sequence with and without equipment/apparatus.

Elementary School Outcomes (K – Grade 5)

By the end of Grade 5, the learner will demonstrate competence in fundamental motor skills and selected combinations of skills; use basic movement concepts in rhythmic activity/dance, gymnastics and small-sided practice tasks; identify basic health-related fitness concepts; exhibit acceptance of self and others in physical activities; and identify the benefits of a physically active lifestyle.

***Swimming skills and water safety activities should be taught if facilities permit.*
