# A Mobile Application for Your School or District To Conduct a Site Assessment

This comprehensive tool allows school and district personnel to walk around a school building and grounds and examine their safety, security, accessibility, and emergency preparedness. SITE ASSESS generates a customized to-do list that may be used in the short and long term, prompts teams to share pertinent information with first responders, and contains relevant resources on several education facility and safety topics. The REMS TA Center developed this secure mobile application to do the following:

- Provide critical information about potential threats and hazards in your school community, which will be used by school planning teams as they develop your school's all-hazards emergency operations plan (EOP);

- Allow teams to add customized questions to the site assessment for their school, taking into account state and local requirements;

- Equip practitioners with information and knowledge about key fundamental site assessment topics, such as Crime Prevention Through Environmental Design (CPTED) and Universal Design; and

- Complement and support your school's mitigation and prevention activities.

To access more information about downloading and using SITE ASSESS, scan the QR code on the right or go to this link: https://rems.ed.gov/SITEASSESS.aspx
